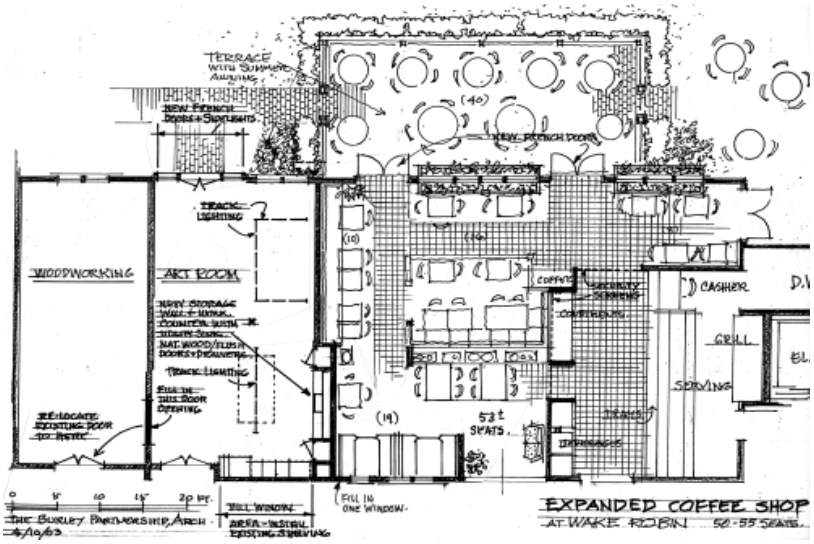
Wake Robin is a Continuing Care Retirement Community located in Shelburne, Vermont, on 135 acres overlooking Lake Champlain. This expansion project is currently under construction, and will add 37 new cottage homes to the community, as well as an 18 bed addition to the skilled nursing facility. The Health Center will be expanded to include a garden tailored for the enjoyment of residents with memory loss.



The Community Center will be renovated to include an expansion of the coffee shop, woodworking shop and art studio. These renovations will also address significant ongoing problems with the mechanical and plumbing systems serving two professional kitchens.

Site Plan.
